

VISIONING THE PERFECT MATH SOLUTION

What are your goals for your daughter? What would a great math experience look like for her? Just as important, what are YOUR needs when it comes to your child's math?

Check the goals that are important to you. Then sit for a minute and picture in your mind what that sort of math experience would look and feel like.

GOALS FOR MY DAUGHTER

- fill gaps in learning
- learn new math skills
- quick recall of math facts
- enjoys math
- solves real-world problems
- critical thinking skills
